## BOX III. OBSERVATIONS WHERE UNITY OF INVENTION IS LACKING

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must be paid.

Group I, claims 1 (in part), 3, 9, 10, drawn to compounds of formula I-I wherein R<sub>A</sub> and R<sub>B</sub> do not form ring, i.e. bicyclic imidazopyridine compound.

Group II, claims 1 (in part) 2, 4-8, 11, drawn to compounds of formula I-I wherein R<sub>A</sub> and R<sub>B</sub> form a 6-membered carbocyclic ring, i.e. tricyclic imidazoquinoline compound.

Group III, claims 1 om [art, drawn to compound of formula I-I wherein R<sub>A</sub> and R<sub>B</sub> forms ring not encompassed by group II.

Group IV, claim 33, drawn to an imidazoquinoline intermediate compound of formula II.

Group V, claims 34, 35, drawn to quinoline intermediate compound of formula III or IV.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: groups I-V have diverse core structures which do not have sufficient similarity to allow a Markush grouping to exhibit utility absent some teaching of equivalence in the prior art.
